making work easy –

This is what makes work easier:

- The heating element is cast inside the floor of the boiler to protect it against water, limescale and the chemicals used during cleaning.
- Real-time limescale measurement and display (2 levels).
- Simple cleaning of the pressure tank thanks to an extra-large service opening.
- Continuous and effective cleaning performance thanks to 2,000 W and 4.5 bar working pressure in combination with innovative steam nozzle technology.

Protected heating element

Extra large service opening
