All the benefits of a laser welder without the price

PUK WELDER D3

THE INNOVATION - NATURALLY FROM LAMPERT

Established and proven technology

**The ideal tool for your dental lab or
Orthodontics Practice.**

Our precision welding equipment has undergone constant development and has been consistently tailored to meet the special welding requirements of the dental industry. The highest degree of functionality has been combined with outstanding design. The result is a precision welder that is not only suitable for everyday use, but which also optically and technically fulfils all the requirements of today's modern dental laboratory.

Biocompatibility constitutes an important aspect in modern jointing techniques; here our PUK WELDER D3 can make a major contribution.

The Benefits of the PUK WELDER D3

- Pin welding mode
- Pulse-welding mode
- Soft welding mode
- Micro welding mode
- Speed control

Our precision welding equipment puts a whole host of possible applications at your fingertips:

- Extensions
- Repair of model casts
- Repair of crowns and bridges
- Joints and constructions for the bases of model casts
- Orthodontic applications

are just a few of the examples. PUK WELDER D3 allows the problem free adding of metal. Whether it's fractures, pores and joints, with the aid of welding wire, material can simply be added and built up. Particularly suited to the welding process are cobalt-chrome alloys, all precious metal alloys, as well as stainless steel and titanium.

LAMPERT.
