

To commemorate our founder, Dr. William Dragan, and his 90th birthday this year, we've added this delightful new flavor, DraganBerry, to our award-winning line of FluoroDose® fluoride varnish!

This special berry blend was inspired by Dr. Dragan's memories of stories his grandmother would tell him of growing up in what was then known as the historic Kingdom of Galicia, and today is part of Poland and Ukraine. She would tell of warm summer days spent picking sweet berries from the local forests which she turned into delicious treats.

Today, as a tribute to Dr. Dragan on this milestone birth year, we have tried to recreate the taste of his youth and this delicious berry flavor. We are excited to introduce DraganBerry™, our newest FluoroDose fluoride varnish flavor! Both children and adults alike will be delighted by this delicious and very special flavor.
