

GC FujiCEM[®] Evolve

The zirconia luting solution from the leader in Glass Ionomer technology

The solution is evolution

GC FujiCEM® Evolve

Building on the legacy GC FujiCEM®, GC FujiCEM® Evolve takes the luting process to the next level!

GC FujiCEM® Evolve offers high bond strength to zirconia, ensuring reliable, long-lasting restorations. It provides high fluoride release and excellent moisture tolerance for enhanced predictable clinical performance.

GC FujiCEM® Evolve is especially indicated for:

High strength ceramic (zirconia and lithium disilicate) crowns and bridges

Metal and porcelain fused to metal (PFM) crowns and bridges

- High bond strength
- New tack-cure feature reduces clean-up time to seconds
- High fluoride release and moisture tolerance
- High radiopacity for easy visualisation

Glass ionomer advantages

Moisture tolerant
No need for rubber dam

Easy to use with no need for primer

Tack-cure ability with good working time (2'15) and fast setting (4'30)

Virtually **no post-operative sensitivity**

Courtesy of Dr. Jeff Lineberry (USA)

Tack cure (3 seconds) for easy excess removal

Courtesy of Dr. Javier Tapia Guadix (Spain)

The solution is evolution

High wettability to zirconia

1. Composite resin luting cement

2. GC FujiCEM® Evolve

1. Composite resin luting cement does not penetrate the microporosities of zirconia.
2. Polyacrylic acid improves wettability to penetrate the microporosities on the surface of the tooth and restoration, and creates a strong interlocking.

High bond strength and radiopacity

Utilises long chain monomer technology by adding long and more flexible monomer chains to enhance the cement's strength and stability.

Cementation of Monolithic tetragonal zirconia crown with GC FujiCEM® Evolve

Initial situation

Dispensing with automix

Seating of the restoration

Rubbery state is reached after just 3 s of tack-curing

Easy to remove excess at once

Final result

GC FujiCEM® Evolve

The solution is evolution

GC push and click tip installation

GC FujiCEM® Evolve syringe (9.2 g / 5.0 ml)

GC FujiCEM® Evolve Single pack:
Syringe (1), Tips Regular (15)

GC FujiCEM® Evolve Triple pack Automix:
Syringe (3), Tips Regular (45)

GC Push and Click Tip Regular (15)

GC Push and Click Tip Endo (15)
