

Harness the Advantages of Single-Use Injection Technology

- Bring your dental practice in line with modern technology
- Meet the current-day needs and requirements of dental patients
- Create a point of difference for your business around comfort and safety

The STA handpiece is the lightest and most tactile solution available in Dentistry – maximizing your injection skill and technique, and providing a true benefit to your patients.

In a post COVID-19 pandemic world, the rules and expectations have changed.

Leverage the benefits that Single-Use injection technology delivers to your business, and promote within your practice a message that connects with your patients:

- Sterile Environment
- No Cross-Contamination
- Enhanced Infection Prevention
