MAXIMA® SELF SEAL STERILISATION POUCHES

- Dual indicators change color when a sterilisation process has begun. To confirm sterilisation, the use of a biological monitor is necessary
- Steam Autoclaves: Turns from blue to black at 121°C for a minimum of 20 minutes
- Ethylene Oxide (EtO): Turns from pink to golden brown after 60 minutes at 50°C, RH 50–80%, and EO concentration of 735 mg/L
- Reliably meets sterilisation standards when used according to the Instructions for Use (IFU)
- When properly stored, instruments maintain their sterility for up to 1 year post sterilisation
- Compatible with autoclaves and ethylene oxide (EtO) chamber sterilisers
