ULTRASONIC SCALER

POWDER THERAPY

Easy-eject water bottle

For your ease and convenience, the water holder can be easily detached and reattached.

Titanium slim scaler handpiece

Including our world-first ultrasonic scaler handpiece made from **pure titanium**. Our unique **DURAGRIP** finish provides excellent grip and stability during use, with the LED light providing great viewability.

Adjustable water volume

With our analogue dial, you have precise and intuitive control of water volume.

Each dial corresponds to the ultrasonic scaler and powder functions.

Water heating

Both the ultrasonic scaler and the powder handpiece will inject heated water ensuring greater patient comfort.

Independent unit & chamber

Our powder unit is uniquely designed to be separate from the main unit. It is built to last and easy to maintain - for a smooth and uninterrupted workflow in your day-to-day clinical practice.

Jet Nozzle for Perio Handpiece

The Jet Nozzle of the Perio Handpiece helps you execute precise, targeted treatment - whether gingival or supragingival.

Powder handpiece, with slim nozzle

Our slim nozzle provides easy access to areas difficult to reach or see.

Smart-display panel

Our all-in-one smart display panel shows only what you need, when you need it, for clear and focused operation.
