Our mission is protecting lives against infection
FOR INFECTION PREVENTION
MICROSHIELD® PROVIDES:

- A comprehensive range of hand hygiene solutions that increase customer confidence
- Effective & easy to use training programs and marketing material
- Customised business solutions for the needs of hospitals and healthcare stakeholders

Advanced Sterilization Products (ASP), division of Ethicon, Inc., a Johnson & Johnson company, has a long track record of designing and delivering innovative infection prevention solutions to help improve better patient safety outcomes.

MICROSHIELD® hand hygiene systems offer solutions to help minimise the risk of infections
Healthcare associated infections are major and growing issues in the quality and safety of health care in both hospital and community settings. Therefore, Johnson & Johnson Medical and ASP® sees infection prevention as an imperative initiative for all of our customers.

The Benefits of Stocking MICROSHIELD®
The ASP® MICROSHIELD® range is a comprehensive system of hand hygiene products providing various solutions to suit most hand hygiene situations in the hospitals. Our products have been carefully designed to deliver the highest product quality standards.

- Our products have been specifically manufactured for healthcare professionals.
- Each product contains the product description; reorder code, expiry date, lot number and clear instructions for use.
- New colour coded system to assist with easy product identification.
The new ASP® MICROSHIELD® brand reinforces global brand consistency and defines who we are, and the value we provide to our customers. Our new visually distinctive and compelling package reinforces ASP® MICROSHIELD®.

For example:

Each product is grouped under our simple colour-coded system and is designed for easy product identification.

In addition to our products, we also provide training and education programs to help promote a culture of infection control and prevention.

Training and educational activities delivered by our professional team of Product Specialists and Clinical Educators include:

- Assistance with implementing the Hand Hygiene Moments in your healthcare facility
- A full hand hygiene clinical awareness campaign in liaison with Infection Prevention personnel at each facility
- Complete dispenser audits to assist in MICROSHIELD® conversion, correct product placement and dispenser integrity
- Technical product training to assist with correct product use
- Raising hand hygiene awareness to help reduce risk of infections
- Provision of educational material such as “talking wall” posters, Hands First DVD/Video audio visual aids, product brochures, training modules and an informative website www.infectioncontrolsolutions.com

**Effectivenesse Training & Educational Support**

Our technology, global distribution, and market position enable us to simplify the process of buying and operating infection prevention products and services every day, for thousands of medical facilities around the world. This in turn enables our customers to focus on what they do best - preventing infection and saving lives.

We will strive without reserve for the greatest possible reliability and quality in our products and to be recognised as a company of dedication, honesty, integrity and service.
