 HENRY SCHEIN®

One Stop for Dental Extraction

Understanding that tooth extraction remains a challenging procedure involving pain & bleeding, Septodont offers you a full solution in one place & one deal. It includes bleeding management, bone grafting and therapeutics to help you manage pain and potential complications. Thanks to Septodont “one stop” solution, you will:

Minimise pain & complications during and after a tooth extraction

Avoid ridge resorption & preserve bone dimensions

Maintain the ability of a successful treatment afterwards

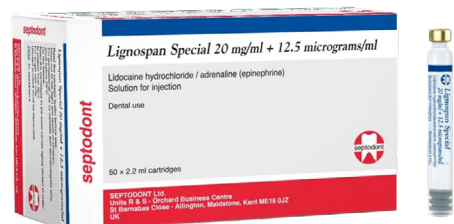

Spare negative impact of teeth extraction on both aesthetics & functional aspects

Anaesthesia

As world leader in dental pain management, Septodont delivers more than just safe and effective products. We go further helping you managing pain for your practice.

Septodont Local Anaesthetics

- Several molecules to suit dentists' clinical needs
- Unique manufacturing process including a terminal sterilisation step
- 100% latex free (product & manufacturing)

Extraction

Bleeding Management

The natural process of bleeding requires to be effectively controlled, Septodont offers a large portfolio of haemostatic. Products with various origin & indications to fit your needs in different clinical situations.

Hemogelatin

- Gelatin (porcine origin)
- Resorbable
- Flexible cube shape (10x10x10mm)
- Individually blister-packed sterile sponges

Bone Grafting

When tooth removal is discussed, it is important to preserve bone dimensions & pave the way for future successful treatment plans. Septodont provides you with a large portfolio of bone grafting products.

Bone Grafting materials

- Highly pure β -tricalcium phosphate
- Fully resorbable & osteoconductive
- Promote strong new bone formation
- Avoid spontaneous ridge resorption
- Restore volume & bone integrity within 3-6 months

R.T.R.+ Syringe

A curved syringe for

- Easy handling for hydration
- Higher precision of placement
- Optimal delivery on the defect
- Available in two formulations

Management of Complications

After extraction, the first days are critical and there is a risk of a painful dry socket. As world leader in pain management, Septodont is committed to provide efficient post extraction solutions for successful healing & pain relief.

Alveogyl

The ideal dry socket dressing after tooth extractions with Penghawar fibers.

- Ensures easy filling of the socket
- Helps to rapidly alleviate the pain
- Promotes hemostasis by compression
- Protects from superinfection
- Is a one step self-eliminating treatment
- No need of special attention other than observation of healing process
