

TePe EasyFit™ — One brush for small and medium gaps

Because gaps between teeth vary, TePe EasyFit™ is a tapered interdental brush that's designed to cover both small and medium spaces between teeth, making it easier to clean between teeth with just one brush.

New

Tapered design covers multiple gap sizes

Soft brush tip for more comfort

Ergonomic handle for a stable grip.

The plastic cap can be used for hygienic protection or to extend the handle.

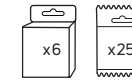

Made in Sweden

TePe EasyFit™

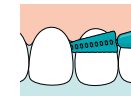

- Tapered design covers both small and medium gap sizes
- Brushes away plaque between teeth
- Soft brush tip for smooth and comfortable cleaning
- Gentle and easy to use for daily cleaning
- User-friendly handle offers a stable grip which enables cleaning with controlled movements

Colour: Turquoise
Size: S/M

TePe EasyFit™ size S/M is suitable for small to medium gaps, comparable to Interdental Brush ISO size 2-4.

How to use:

For small gaps: Insert the brush between the teeth until you feel resistance and move back and forth.

For medium gaps: For use between back teeth curve slightly.

Also suitable for braces.
