

Clinpro™ Preventive Products

Clinpro™ Tooth Crème
0.21% Sodium Fluoride
Anti-Cavity toothpaste with fTCP

950 ppm NaF with patented functionalised Tri-Calcium Phosphate (fTCP) that remineralises the tooth and aids in the reversal of white spot lesions.

Clinpro™ White Varnish
5% Sodium Fluoride White Varnish

22,600 ppm NaF with patented functionalised tri-calcium phosphate (fTCP) – flows smoothly and inter-proximally on moist or dry teeth and sets rapidly in the presence of saliva without any yellow colouring.

Clinpro™ XT Varnish

Fluoride-releasing durable coating that seals and protects dentine tubules to relieve hyper-sensitivity and lasts up to 6 months.

Clinpro™ Sealant

Patented colour-change technology – goes on pink to see placement, then cures to a natural white. Low viscosity and fluoride-releasing.

High Fluoride Toothpaste now available:

Clinpro™ 5000

1.1% Sodium Fluoride Anti-Cavity Toothpaste

Patient-friendly: Aids compliance.

Low abrasion:

Provides gentle, effective cleaning and is comfortable for patients to use even on exposed root surfaces.

One-step compliance:

Clinpro™ 5000 Anti-Cavity Toothpaste simply replaces your patient's current brushing regimen.

Patient-friendly flavour:

Clinpro™ 5000 is available in a mild Vanilla Mint flavour, suitable for patients 6 years or older.

Convenient flip-top 113 g tube:

Lasts six months, so it's easy to renew at each appointment.

Consumer Medicine Information – Extract. Indications: Clinpro™ 5000 is a fluoride toothpaste for use after recommendation by a dentist or healthcare professional, in the prevention of dental caries in high risk patients. It is usually used once a day in place of your conventional toothpaste unless instructed otherwise by your dentist or healthcare professional. Pharmacist only Medicine – available from your dentist or healthcare professional. **One-step compliance:** Apply a thin ribbon or pea-sized amount of Clinpro™ 5000 to a soft-bristled toothbrush and brush teeth for at least two minutes. After brushing, adults should expectorate. Children 6 to 16 years of age should expectorate and rinse mouth thoroughly with water. For best results, do not eat or drink for 30 minutes after use. Follow these instructions or use as directed by a dentist or healthcare professional. **Contraindications:** Not recommended for use in children under 6 years of age. Do not use Clinpro™ 5000 toothpaste if you have known allergic reactions or have hypersensitivity to any of the ingredients. If you are pregnant or breastfeeding, speak to your dentist or healthcare professional before use. For full precautions and warnings, refer to the Prescribing Information and Consumer Medicine Information at www.go.3m.com/clinpro5000au or www.go.3m.com/clinpro5000nz. Healthcare professionals should review the full Product Information before prescribing.
