Composites

CLEARFIL MAJESTY

More than a product, a benchmark for quality.

The name **MAJESTY** was chosen to reflect premium quality, excellence, and superior aesthetics in dental restorations. Kuraray's expertise in resin chemistry began in 1978 with **CLEARFIL™ BOND SYSTEM F**, the foundation that ultimately led to the CLEARFIL MAJESTY™ platform.

MAJESTY composites are engineered for:

- High performance and aesthetics through advanced surface-treated fillers that allow high loading with good handling.
- Natural tooth-like fluorescence for lifelike results.

Insights from **Dental Magazine No. 195 (Morita Corporation)** highlight the platform's rigorous production standards:

- **Controlled manufacturing environment** — including airlock systems, air showers, and yellow-light areas to prevent premature curing and ensure consistency.
- **Extensive quality and stability measures** — long-term sample retention (monitored one year past expiry) and extreme temperature stress tests to verify dependable storage and transport performance.

Practice trends we're seeing

Bulk-fill composites have gained strong momentum in Australia, driven by a growing demand for quicker, minimally invasive restorative procedures.

Many clinicians are now choosing these materials to:

- Streamline appointments by reducing chair time
- Simplify placement while delivering durable and aesthetic results

Reflecting this shift in clinical preference, **internal data shows that bulk-fill composite volumes have increased by over 40% since 2020**, demonstrating how well these materials align with efficiency-focused workflows.

Our customers are loving

GC G-aenial Universal Flo >

Easy, injectable flow with the strength of traditional composite.

Maxima Composite Polishers >

Diamond-infused, durable, smooth surface polish.

BA Optima Light Meter >

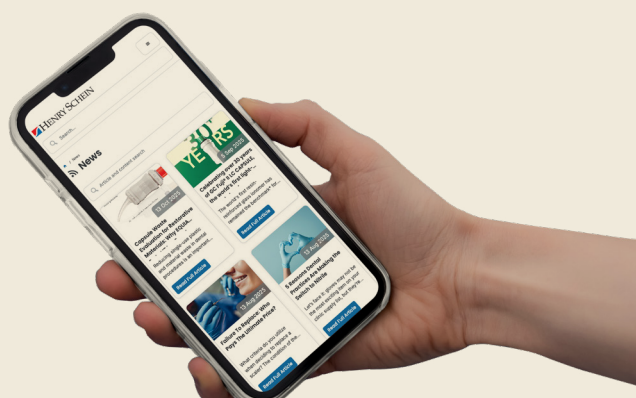

High range precision.

HENRY SCHEIN®

**It is not just about stock.
Real People. Real Support.**

We are here to help you every step of the way, not only stocking the largest range of leading global brands but also supporting every aspect of your practice with industry leading expertise.

20+ Australia-based customer care agents ready to help

30+ Specialist consultants (Equipment, Imaging, Surgical, Ortho, Lab & Digital)

40+ Factory-trained service & handpiece technicians

45+ Dedicated relationship managers supporting practices across Australia

The new Mocom Autoclave range:

- Clean, minimalist design, elevates the clinical space
- Built for next-level hygiene, safety, and precision
- A step-by-step interface makes every sterilisation cycle smooth, intuitive, and stress-free
- Engineered to support operators with smarter functionality and improved workflow control
