PANAVIA Veneer LC

The Veneer Specialist

PANAVIA Veneer LC is specially designed for thin, translucent veneers, ensuring maximum working time and control.

- **Colour Stability.** Delivers long-lasting esthetics with shades that remain stable over time, ensuring beautiful anterior cases.
- **Precise Handling.** Thanks to its flowable consistency, PANAVIA Veneer LC allows for easing seating and clean up, preventing veneer drift or gaps.
- **Strong Bonding.** Pairs seamlessly with PANAVIA V5 Tooth primer and Ceramic primer, ensuring a great bond tooth structure.

KATANA Zirconia YML Discs

An All-in-ONE Solution

One Disc. Infinite Possibilities

KATANA Zirconia YML combines high translucency and 750-1100 MPa flexural strength in a seamless multi-layered structure.

From anterior veneers to full-arch bridges, it's your all-in-one solution for life like aesthetics and long-lasting durability.

- 45-49% translucency.
- 54- minute high-speed sintering.
- Controlled firing deformation for precision fit.

Designed for technicians who demand beauty, strength, and efficiency – without compromise.
