Presented by
Associate Professor Bernard Koong  
BDSc(W.Aust), MSc(OMR)(Toronto), FICD, FADI, FPFA  
Oral and Maxillofacial Radiologist

Topics covered will include...
- The principles behind CBCT
- CBCT image and technique selection
- Radiation dose levels: comparing CBCT, multislice CT, OPGs and intraoral imaging
- Reducing radiation risk
- Introduction to CBCT interpretation

By the course’s conclusion, participants will be able to understand...
- The basic principles of cone-beam computed tomography
- Identify the risks associated with ionizing radiation and how to minimize exposure
- Recognize when to prescribe CBCT scans based on high-yield criteria and minimized radiation dose
- Essential principles of radiological interpretation.
- Specific software applications and utilizations such as implant planning and impactions.
**Associate Professor Bernard Koong**  
BDSc(W.Aust), MSc(OMR)(Toronto), FICD, FADI, FPFA  
Oral and Maxillofacial Radiologist

Bernard is a founding partner at Envision Medical Imaging, a multidisciplinary comprehensive private radiology group in Western Australia. He also consults internationally, providing opinions to dentists, specialists and radiology colleagues.

As an invited speaker, Bernard has presented more than 80 lectures to the dental and medical professions across Australia, USA, Canada, Malaysia, Singapore, Switzerland, Hong Kong (SAR, China) and New Zealand.

He holds the position of Clinical Associate Professor at the University of Western Australia and Associate Professor at the University of Hong Kong. His teaching commitments include provision of the radiology course for the Masters Degree programme in implantology developed by Prof Klaus Lang. He also presents lectures to radiology registrars of the Royal Australian and New Zealand College of Radiologists (RANZCR).

He is a member of the Editorial Board of the prestigious Clinical Oral Implant Research journal.
