

# Implant Dentistry Seminar

## OPTIONS FOR AN EDENTULOUS PATIENT

with **Daniel Demosthenous**

This Implant Dentistry Seminar on opinions for an Edentulous Patient is a locally held seminar hosted by Dr Daniel Demosthenous covering all aspects of planning, management, restoration and complications associated with implant dentistry. This fun and relaxed evening will draw on the experience of Dr Demosthenous with the ultimate goal being consistent successful aesthetic implant outcomes for your patients.

It is a great opportunity to network and discuss or present your own cases in a supportive environment. It will be aimed at all levels of skill from the absolute novice to the experience clinician.

**FREE  
SESSION**

**2 CPD** HOURS

Dr Demosthenous grew up in Sydney and attended high school in rural Queensland. He obtained his science degree with first class honours prior to completing his dental degree at the University of Sydney.

With a keen eye for detail, his special interest in oral surgery stems from a love of anatomy. Dr Demosthenous has been heavily involved both in teaching anatomy at Sydney, New England and Charles Sturt Universities over the past 8 years.

Shortly after graduating, Dr Demosthenous gained further oral surgery training while working in the specialist Oral and Maxillofacial Surgery department at Westmead Hospital. While he enjoys all aspects of general dentistry, his particular interests are in wisdom teeth removal and implant surgery. Over the years, he has worked extensively in Sydney and country NSW and is happy to now call Forbes home.
