

Practical Protocol for Saving Teeth & Implants

A team approach

UP TO
5.5 CPD
HOURS

The SWISS DENTAL ACADEMY is one of the key pacesetters in dental prophylaxis and periodontal disease management training. Based on the latest scientific knowledge, the theory and practical courses are taught in terms of practice-oriented requirements. Under the guidance of experienced trainers, you'll learn about Guided Biofilm Therapy and practise your treatment expertise by using the most modern air-polishing and ultrasonic devices. This is a unique opportunity for dentists and hygienists in the dental practice today!

Ask how to become a certified Guided Biofilm Therapy Clinic after the course.

REGISTRATION ENQUIRIES: 1300 302 421 | www.henryschein.com.au/education

Are you ready to shift your paradigms to include Guided Biofilm Therapy as your approach for preventive and periodontal maintenance treatment? If so, this CPD is for you!

Lecture

Aimed at the whole dental team to discuss the most modern, gentle and cost effective techniques available for periodontal and implant maintenance. Participants will discover Guided Biofilm Therapy (GBT) and learn why it integrates with the modern concept of preventive and minimally invasive dentistry. Key topics include: how to make periodontal treatments more effective and more enjoyable to you, your patients and dental practice.

Periodontal Disease

- Understanding biofilm and its effects
- The 8 Steps of Guided Biofilm Therapy for professional biofilm management
- Effectiveness of GBT compared to conventional methods for preventative therapy, maintenance and periodontal treatment
- Current periodontal disease classifications and understanding CAL
- AIRFLOW® - indications and benefits

Implant Disease

- How to best care for implants
- Recommended routine maintenance protocol
- Identifying mucositis and peri Implantitis
- Treating non-surgical mucositis and peri Implantitis with GBT/AIRFLOW

Hands-on Workshop (Clinician-on-Clinician)

This workshop is the ideal platform for dental professionals wanting to perfect themselves. Participants will have an opportunity to follow the complete Guided Biofilm Therapy protocol step-by-step first on simulation models and then clinically on one another in the clinic chair. Dental professionals will learn to maximize efficiency and patient comfort.

Learn how to

- Correctly utilise supra and sub gingival air polishing devices to eliminate biofilm prior to hard deposit removal
- Correctly apply ultrasonic instrumentation for optimal hard deposit removal

Specific Conditions upon Registration

Full Day Participants must:

- Be willing to practice on each other
- Hold a current registration with the Dental Board of Australia and be willing to show certificate if requested
- Provide Professional Indemnity Insurance Certificate including Civil Liability

Dr Wendy Gill

Dr Wendy Gill graduated from UWA in 1994 and spent 9 years in general practice before completing her Masters Degree in Periodontology in 2006. Wendy obtained her Fellowship of the Royal Australasian College of Dental Surgeons (Perio) in the same year and now maintains a specialist periodontal practice in West Perth. She is a previous president of the Australian Society of Periodontology (WA), a Fellow of the International Team for Implantology, AOS member and member of numerous dental groups. Wendy co-ordinates a local ITI Study Club and is on the council for the Australian and New Zealand Academy of Periodontists (ANZAP). She lectures locally and nationally on periodontal and dental implant topics.

Jennine Bywaters

Jennine Bywaters graduated in 1987 from Curtin University with an Associate Diploma in Dental Therapy. She has attained the Cert. Health Education, a BSc in Health Promotion and post a Grad Dip in Occupational Health and Safety.

She has been a clinical demonstrator for student dental hygienists at Curtin University and participates in the clinical placement programme.
