

Digital Implantology, Implant Planning, Guided Surgery & 3D Printing

Presented by Dr Christopher Ho

Course Outline

Digital Implantology has been on the agenda of the dental industry for a few years now but many clinicians are still faced with the dilemma whether to jump on board with the new technology.

During this exciting and informative day of digital implantology with Dr Christopher Ho, you will see presentations on real cases demonstrating the level of predictability that can be reached by utilising the latest technology.

The presentation will be followed by a practical workshop where you will see live surgery and participate in multiple cases of implant planning and surgical guide design, using 3Shape Implant Studio, followed by hands-on guided implant placements on models. This is a fantastic way to grow your understanding in digital dentistry and see how you can integrate these workflows into your own practice producing successful clinical outcomes.

- Introduction to Implant Dentistry
- Presentation Posterior 1-Unit Case
- Hands-On Planning of Case and Surgical Guide Design
- 3D Printing
- Live Surgery
- Drilling in 3D Printed Model

Presenters Biography

Christopher is a specialist prosthodontist in private practice in prosthodontic and implant dentistry in Sydney. After his dental training at the University of Sydney, Christopher completed the Graduate Diploma in Clinical Dentistry in Oral Implants at the University of Sydney, followed by a Masters of Clinical Dentistry in Prosthodontics at the University of London, and then specialist training in prosthodontics at the University of Sydney.

Christopher lectures extensively on aesthetic and implant dentistry, and teaches into the Oral Implant Diploma and Post-graduate Prosthodontic programs at the University of Sydney. He is a Faculty member of the Global Institute for Dental Education, Academy of Dental Excellence and is a visiting lecturer at Kings College London. Christopher is the author of numerous publications and is editor of the textbook "Practical Procedures in Aesthetic Dentistry".
