

IMAGING Focus

Presented by Dr. Raahib Dudhia

Join Henry Schein Halas for an evening with leading Dento-maxillofacial Radiologist Dr Raahib Dudhia, dedicated to improving your OPG imaging skills to optimise the efficacy of each scan, covering interpretation and pathology theory as well as practical elements such as patient positioning.

The training will cover:

- OPG techniques
- OPG troubleshooting
- Patient Positioning
- Radiation dosimetry
- OPG Interpretation
- Intro to pathology
- Intro to 3D imaging

Date and Time:

Thursday 23rd November, 6.00pm to 9.00pm

Venue:

Henry Schein Halas Brisbane Showroom
Ground Floor, 8 Gardner Close, Milton QLD

Cost:

\$50 per person

CPD hours:

3 hours (Scientific)

Booking:

Book online at: imagingfocus.eventbrite.com.au

About Dr. Raahib Dudhia

Dr Raahib Dudhia completed his training in Dento-maxillofacial Radiology at The University of Queensland and has extensive experience in private radiology practices in Queensland and NSW, reporting conventional dental radiographs as well as CBCT, CT and MRI scans. Raahib has also teaches dental imaging to undergraduate and post-graduate students as well as dental assistants and radiographers. Recently, he has started an online Dental Radiology Consultancy, assisting practitioners with reporting and protocol advice, as well as providing a second opinion on scans taken in medical imaging practices.

Raahib has had access to CBCT since the early days, and has seen the maturation of CBCT technology into a highly valuable diagnostic tool in dentistry and medicine. A bit of a tech lover, he likes to keep up to date with new machines and CBCT viewers as they become available.
