

Free Tutorial Evening – Melbourne
Tuesday 29th October 2019

Membranes in Guided Bone Regeneration and Periodontal Plastic Surgery –The Latest Trends & Surgical Techniques

Presented by A/Prof Dan Brener
Prosthodontist and Founder of Brener Implant Institute (Bii)

Membranes have been used in surgery since mid-last century, this fascinating field has expanded and diversified from plastic fenestrated cages to a variety of allograft, xenograft and autogenous stem cell origins. Novel surgical techniques have been developed to improve their use. This talk will guide you through the choices, indications and combinations that will enhance patient outcomes.

A/Prof Dan Brener BDS MDSc MRACDS

A/Prof Brener graduated Dentistry at the University of Sydney in 1983 and obtained his Master of Dental Science in Prosthodontics at Sydney University in 1987. In addition to numerous international and Australian lectures and courses, A/Prof Brener has been a lecturer and mentor of The University of Sydney Implant Diploma and the Australian Society of Implant Dentistry.

Brener Implant Institute (Bii) was established in 2003 to help set and elevate the standard of care in implant dentistry by teaching Dentists using a hands-on approach. Bii uses progressive well documented information and hands on experience to provide participants with the skills, knowledge and confidence to make implant placement safe and predictable. Bii's program focuses on teaching the most successful, evidence based and "state of the art" implant techniques.

REGISTRATION FORM
