

AN INTRODUCTION TO BONE GRAFTING

2.5 CPD HOURS

Join us for an Introduction to Grafting lecture and learn all about the latest developments in socket grafting techniques. Dr Dean Licenblat, will provide an overview on all the steps from patient and graft selection to closure techniques.

- Which patient is ideal for grafting
- Medical Complications
- Patient acceptance techniques
- What is a Xenograft, Allograft and Alloplast
- When to use which product and when to not place a graft.
- Closure and Suturing Techniques

Presenter Biography

Dr Dean Licenblat

Dr Dean Licenblat is currently principal clinician at Sydney Dental Aesthetics & Implants located in Martin Place Sydney. He has completed a master's degree in oral implantology and bone grafting from Goethe University in Frankfurt and is up-to-date on the latest concepts and techniques.

He has a teaching appointment from Goethe and is responsible for tutoring that university's graduate students in Australia and New Zealand. Dean is the principal investigator for a prospective randomised clinical trial that, for the first time, is studying the hard and soft tissue response to both titanium and zirconia implants in a split-mouth design.

Dr Dean Licenblat has one of a few dental surgeries to be awarded 'Leading Implant Centres of the World' in Australia. BDent (USyd), MSc (Oral Implantology) Goethe, Diplomate (ICOI), Clinical Instructor (Goethe University).
