

iTero Digital Restorative Workflow Seminar.

> Intraoral scanning integration for effective results and practice efficiency.

iTero

Overview.

Intraoral scanning replaces more than just conventional impression taking methods, it has the potential to improve patient experience, increase practice efficiency and achieve more predictable outcomes. This seminar will teach those who are new to intraoral scanning, or those who would like to get the most out of their iTero intraoral scanner for restorative applications.

A paradigm shift from analogue to digital is happening right now, the path of digital transformation in the dental industry has seen innovative solutions creating effective and efficient results for dentists. Digitisation within dental practices are happening in one way or another, setting practices apart, and helping practices achieve better results and efficiencies.

Program highlights.

- Understanding digital file outputs and applications
- Scanning strategies for optimal results including tooth prep and gingiva management
- Hands-on experience and live demonstration of digital restorative workflow
- Preview caries detection aid with iTero Element 5D scanner all within ONE scan
- Presentation of restorative cases with iTero scanner integration
- Applications for patient monitoring in everyday dentistry

Why you should attend?

An in-depth look into how intraoral scanning can be integrated into your own restorative workflow. This is an opportunity to take a deep dive into how it can help your dental practice become more efficient.

Who should attend?

- Practice owners
- Principle dentists
- Dental hygienists
- Dental assistants

About your presenter.

Dr Ingo Baresel - DGDOA, Germany.

Dr Ingo Baresel is an accomplished international speaker and author of numerous articles relating to digital workflows and intraoral scanning. After completing his studies and residency, Dr Ingo Baresel joined his practice Praxis Dres. Baresel in 1999. Since 2012, Dr Baresel's practice has been working with digital workflows, gathering a wealth of experience on this subject. As a founding member and President of DGDOA (German association for intraoral scanning), Dr Baresel is passionate about sharing his extensive experience and findings from several scientific studies with fellow professionals.

Date 9.00am-5.30pm (Registration opens at 8.30am)
Friday 28 June 2019

Location Henry Schein - Sydney
Building 3
Level 6
189 O'Riordan Street
