

# An Introduction to NATURAL WAX UP Techniques

**14 CPD  
HOURS**

PRESENTED BY: **Manfred Tauber**

## Course Outline

Provides a basic understanding of the function and the occlusal compass with its movements. Natural morphology is learned by means of an enlarged wax-up plate, with individual cusp segments of the occlusal surface of an upper molar.

Using didactic methods, the morphology and the contact relationship to the teeth in the mandible are conveyed, step by-step, on an upper molar in a model.

The aim is to achieve a natural morphology, the correct placement of the contact points and their clearance for movement.

## Course Objectives

- Wax-up techniques and wax technology with electrical devices
- The Occlusal Compass
- Colour code according to Dieter Schulz
- Morphology of the occlusal surface
- A wax-up in sections of each individual occlusal segment (molar 26) on the segment plate
- Step-by-step, detailed wax-up of the entire occlusal surface (molar 26) with contact point relationship to the lower jaw (Angle Class 1) on the model
