

SCHEIN TV EPISODE 8

A FIRST FOR DENTAL CPD IN AUSTRALIA

EPISODE 8

Aesthetic Developments & In Direct Ceramics - The Next Frontier

Presented by Dr Anthony Mak and Dr Christopher Ho
Wednesday 22 November 2017 7PM AEDT

Join Dr Anthony Mak and Dr Christopher Ho as they share their combined knowledge, experience and practical information on aesthetic developments in all ceramics.

In past years there have been remarkable advances in adhesive dentistry and dental techniques, taking all ceramic restorations to a new frontier. Dr Christopher Ho and Dr Anthony Mak have been instrumental in pioneering and developing these techniques. With their vast array of experience and dedication to achieving not only an aesthetic outcome, but a restorative solution that can perform functionally in the patient's mouth without compromise.

Learn how to utilise the latest materials that outperform current restorative choices with their life like natural appearance, while achieving optimal physical properties. Chris and Anthony will demonstrate how to obtain a predictable procedure to achieve aesthetic results.

They will cover topics such as shade selection, clinical design, placement and cementation options such as where to bond and where to cement, material pre-treatment and how to avoid failure.

Both Chris and Anthony will share cases and Anthony will be demonstrating with one of those cases during the live stream to give you visual information on the completion of his case.

Be sure to mark your calendar for 22 November 2017 at 7PM AEDT to watch the full episode!
