## Controversies in Local Anaesthesia

Presented by

Dr Greg Mahoney

Dr Wolfgang Jakobs

Dr Nigel Robb

Local Anesthesia is the most commonly used drug in dentistry. With 3 leading experts in pain management, we will review the most controversial topics and common misconceptions surrounding LA. Discuss issues that can arise on a daily basis and gain up to date knowledge on the clinical differences of all local anesthetics including dosages, using multiple molecules in one treatment, efficacy, clinical evidence, safety and the compromised patient. Make the right choices for managing pain in your practice.
