

The Future of Modern Prophylaxis for General Practice

Are you ready to shift your paradigms to include Guided Biofilm Therapy as your approach for preventive and periodontal maintenance treatment? If so, this CPD is for you!

LECTURE

Aimed at the whole dental team to discuss the most modern, gentle and cost effective techniques available for periodontal and implant maintenance. Participants will discover Guided Biofilm Therapy and learn why it integrates with the modern concept of preventive and minimally invasive dentistry. Key topics include: how to make periodontal treatments more effective and more enjoyable to you, your patients and dental practice.

Periodontal Disease

- Understanding biofilm
- The 8 Steps of Guided Biofilm Therapy for professional biofilm management.
- Insights on ultrasonic and air polishing technologies for biofilm removal

Implant Disease

- Applying the above principles to implants
- How to best care for implants
- Prevention and treatment of peri-implant mucositis

Associate Professor AXEL SPAHR
Dr. Med. Dent. Habil.

Axel Spahr is Head of Periodontics at the Sydney Dental Hospital and Head of the Discipline of Periodontics at the University of Sydney. A/Prof. Spahr is the former Head of Periodontics at the University of Ulm in Germany and has worked at various international universities and research facilities. He has additional training in microbiology, molecular biology, extensive experience in basic science research, animal research and clinical research.

A/Prof. Spahr's research interest includes periodontal regeneration, bone regeneration, periodontitis and systemic diseases as well as antimicrobial therapy. He has lead large externally funded research projects and is collaborating with leading international research groups and companies in the field of periodontology, implantology and bone regeneration. He is author of numerous publications in international peer-reviewed dental and medical journals and has presented his work on professional conferences worldwide. A/Prof Spahr is a Board Registered Periodontal Specialist and is the current Secretary of the Periodontal Research Group of the International Association of Dental Research (IADR).

HANDS-ON WORKSHOP

This workshop is the ideal platform for dental professionals wanting to perfect themselves. Participants will have an opportunity to follow the complete Guided Biofilm Therapy protocol step-by-step first on simulation models and then clinically on periodontal patients. Dental professionals will learn to maximize efficiency and patient comfort.

Learn how to:

- Correctly utilise supra and sub gingival air polishing devices to eliminate biofilm prior to hard deposit removal
- Correctly apply ultrasonic instrumentation for optimal hard deposit removal
- Learn which, when and where to utilise the different prophylaxis powders

Presented by Dr Associate Professor Alex Spahr

3.5 to 6 CPD Hours

NEW SOUTH WALES

Saturday 7th April 2018, Sydney Dental Hospital
2 Chalmers Street, Surry Hills NSW 2010
