

Risky Business

Minimising Risk in the Dental Practice

Presented by: Jane Rossi and Deb Brown

6.5 CPD
Hours

\$110

Course Synopsis

Risk Management plays a critical role in every successful practice. Implementing an effective process that improves the quality and safe delivery of healthcare is possible by introducing proven systems that identify and prevent circumstances that put patients and staff safety at risk.

Our presenters will spend the day providing you with a snap shot on areas such as duty of care, positional ergonomics, successful risk detection and minimising sharps injuries and instrument breakages. Throughout the session, they will also provide valuable take-home tools to help incorporate new safety routines within your office. This course is divided into informative modules which will cover the following topics and learning outcomes and includes a workshop to help strengthen the information presented.

Call of Duty: It's Not Just a Game

Module Topics:

- Rekindling your mojo for prevention
- Update on current responsibilities
- Dialogue V's Monologue –
How are you communicating with your patients?

Learning Outcomes:

- How to Prevent and not just Treat
- Incorporating Duty of Care Practices into your daily routines
- Improved communication skills for optimal health outcomes

Be Your Own Hero

Module Topics:

- Positional Efficiency in the workplace
- Be your own personal life-saver by looking after yourself

Learning Outcomes:

- Review & perform positioning principles in a simulated workplace environment to identify early symptoms and prevent long-term injury

The Oral Cavity: A Black Hole of Risks

Module Topics:

- What are the appropriate tools for successful risk detection?
- What are modifiable & non-modifiable risk factors?

Learning Outcomes:

- Utilisation of appropriate diagnostic intervention resources
- Being able to identify local & systemic risk factors

Don't Get Stuck!

Module Topics:

- Go with the Flow – Maximising your clinical workflow practices
- The real cost of sharps injuries and broken instruments
- Instrument Auditing

Learning Outcomes:

- Understanding how safe & efficient workflows can save you money and time
- Review and perform your own instrument audit

How the best perform
