

invisalign® go

Invisalign® Go training course.

Presented by:
**Dr Bharat Agrawal, Dr Jack Milgate
& Dr Gabrielle Klingberg**

A teeth-straightening treatment designed especially for dentists.

Invisalign Go clear aligners are easy to use, offering up to 20 aligners for treatment of the second premolar to second premolar in as little as 3 months.⁽¹⁾⁽²⁾

Attendance at the Invisalign Go training programme is designed to help you develop new skills that will enable you to extend your practice offering to treatment of minor aesthetic cases.

The programme consists of in-person training, with live hands-on sessions. The live sessions offer hands-on tips and techniques for Invisalign Go interproximal reduction and attachments.

The content focuses purely on the use of Invisalign Go in the treatment of patients with minor cosmetic concerns. No orthodontic theory will be presented.

⁽¹⁾Weekly aligner changes are recommended for all Invisalign Go treatments (with default staging protocol).

The decision to prescribe weekly aligner changes is at the doctor's discretion. Monitor tooth movements such as rotations, extrusions and significant root movements. Depending on the patient response to treatment, particularly mature adults, consider longer periods between aligner changes. ⁽²⁾ Treatment times vary with Invisalign Go.

⁽³⁾Orthodontists, Paediatric Dentists and Active Invisalign Dentists are unable to register for this course.

⁽⁴⁾Attendees must be a registered General Dentist.

Dr Bharat Agrawal

Dr Bharat Agrawal has completed his Masters in Aesthetic Dentistry with Distinction (MSc AesDent) through King's College in London. His final year dissertation looked at the effectiveness and longevity of take home dentist prescribed tray bleaching techniques combined with a clinical audit.

He has presented on tooth whitening alongside minimally invasive aesthetic Dentistry in Australia and in the UK. He has had a case report selected for publication by Invisalign Australia as a clinical white paper

which looked at combination aesthetic treatments including alignment, whitening, additive bonding and dentofacial aesthetic corrections using injectables.

He has successfully utilised the Invisalign protocol and digital workflow using the iTero Elements scanner to achieve significant smile improvements without the removal of valuable hard tissue. He is actively involved in mentoring and teaching recent graduates and is passionate about the paradigm shift towards minimally invasive approaches to comprehensive smile make overs.

Dr Jack Milgate

Dr Jack Milgate is originally from Northern Victoria – Echuca/Moama, where he grew up before moving to Bendigo to study at Latrobe University. Jack spent 2 years working and completing his Masters program in public dental health clinics throughout regional Victoria.

He has been part of the team at Hobsons Bay Dental in Melbourne, since December 2012. Jack enjoys all aspects of general dentistry with particular interests in providing thorough diagnosis, assessment and treatment planning, as well as improving smiles with aesthetic treatments

including Invisalign clear orthodontics. Outside of dentistry Jack enjoys tennis, travelling and spending his time getting his hands dirty in the shed.

Dr Gabrielle Klingberg

Dr Gabrielle Klingberg graduated from the University of Adelaide in 2012 and began her career working in her home town of Murray Bridge at a private dental practice.

The rural setting allowed her to develop and hone her general practice skills as well as learn good time management. At the same time she began working at Perfect Smile, a busy dental practice in the heart of the Adelaide CBD where she has been practising now for almost 6 years.

The 12-chair private practice has a focus on the true meaning of holistic dentistry, and where cosmetic and aesthetic treatment is at the forefront of Gabrielle's day. The cosmetic focus of the practice fostered her love of orthodontics, especially in relation to Invisalign. She has been able to use the treatment modality not only to complete functional orthodontics but also for pre-prosthetic alignment to assist in positive outcomes for form as well as function.

She is a contributing member to the dental industry in South Australia, where she is a member of the Prosthodontic Society, Secretary/Treasurer of the Endodontic Society of SA, and is a board member of the Dental Research Education Fund which assist in the funding of the Milton Sims program within the country.

Integrated support, every step of the way.

Be confident in delivering predictable pre-restorative anterior alignment. All Invisalign Go doctors benefit from:

- A bespoke training course, giving you the skills to become a Provider
- The power of a digital workflow
- Fortnightly webinars
- Online study groups
- Access to a dedicated Henry Schein representative.
