

Presented by A/Prof. Max Guazzato & Dr. Linda Quach

MasterPrep is a two-day course focusing on practical skill development for tooth preparations in fixed prosthodontics. This unique course will give the participant an opportunity to practice and learn clinically relevant points of tooth preparation. MasterPrep caters for the use of a variety of dental products such as burs, handpieces, ultrasonics and dental materials in a non-biased environment. Emphasis will be placed on tools and techniques to prepare a tooth and effectively apply this to practice. Clinical examples & hands-on activities will be used to explain the techniques so that the skills can be applied as soon as you return to the clinic.

Why VIP? Because this version of MasterPrep is unique as it is restricted to only 10 participants. It will include dinner on Friday night at 2 chef-hat restaurant Biota in the Southern Highlands of NSW. Be prepared for some fun where we will combine good food & good Dentistry. The course is informal and interactive. You will be able to challenge yourself and the other participants with games, prizes and friendly competition. Who will walk away with the trophy and title of 'Winner of MasterPrep VIP 2018'?

COURSE TOPICS

- Case selection and treatment planning
- Masking stained teeth for a good aesthetic outcome
- Understanding tooth properties and reasons for failures
- Shade & ceramic selection
- Tooth preparation protocols & workflow (conventional & digital)
- Wax-up, mock up and silicone indexes

A/Professor Max Guazzato

DDS(Hons 1), PhD, DClinDent (Pros), FRACDS, MRACDS, FPFA, FICD, CDT Prosthodontist
A/Prof of Oral Rehabilitation University of Sydney

Associate Professor Max Guazzato finished Dentistry with first place and honours at the University of Milan and continued further with postgraduate training in Oral Surgery. Prior to University studies Max completed a five-year full time Dental Technician diploma at Milan Technology College. After over a decade in private practice and University lecturing, Max moved on to a PhD at Sydney University in the field of Zirconia and dental ceramics and then completed a three-year clinical doctorate in Prosthodontics. He is registered as a specialist Prosthodontist and has a particular interest in dental implantology and complex oral rehabilitation. Max has a dental fellowship by examination and is a prosthodontics special field member of the Royal Australasian College of Dental Surgeons.

Max loves presenting MasterPrep as it really helps participants to focus on the key points of execution in fixed prosthodontics which are commonly overlooked in a busy private practice.

Dr Linda Quach

BDS(Hons), Post Grad Dip Dental Implantology,
General Dentist

Dr Linda Quach completed Dentistry at The University of Sydney with honours. Some research in ceramics led to the start of her adventure into ceramic restorations and the co-authoring of four peer-reviewed journal articles. With influence from Max, Linda continued formal studies to complete a Post Graduate Diploma in Dental Implantology with distinction at Charles Sturt University. Linda's professional interested lie in general dentistry and in particular diagnosis, treatment planning, direct composite, indirect ceramic restorations and CAD-CAM technology.

Linda loves presenting MasterPrep for its useful reinforcement of essential concepts, as well as the games. She's always up for a bit of friendly competition.

Registration

Register before 10th Dec 2017 for complimentary dinner and accomodation at Biota Restaurant
